

THE COMPANY

Since 1991, TurboChef Technologies, Inc. has pioneered the world of rapid cooking. With innovation and top performance in mind, TurboChef has redefined cooking efficiency by designing rapid-cook ovens that are versatile, user-friendly, and save energy. TurboChef ovens cook faster and produce consistent results without compromising quality.

Unparalleled Service and Culinary Support

Implementing a TurboChef oven into your foodservice operation would be incomplete without exceptional support. From global, factory-trained technical support to a culinary team that can help you discover all the benefits of rapid cooking, we've got you covered.

Technical and Customer Support

Complete customer satisfaction is the basis for our success, and we are committed to provide only the best service and support. Our service network is available seven days a week and includes 225 customer service organizations and over 4,000 service technicians. As a manufacturer, we understand that training, support, and coaching are vital to providing the best customer service in the industry. Our global training classes educate service agents about our technology and sharpen their troubleshooting skills. This means no matter where your restaurant is located, there is always a TurboChef expert nearby.

Culinary Experts

With the help of TurboChef Culinary, you truly get the most out of your oven. Our culinary staff and TurboChef Certified Chefs are available to help with any cooking questions you

may have. You can schedule a full demonstration for any of our products, or work one-on-one to develop optimized cook settings for your specific menu needs. TurboChef Culinary can help ensure your products are consistently delicious, no matter who is doing the cooking! For more information, call 214-379-6077 or email certifiedchefs@turbochef.com.

Ventless Support

Need help with a ventless installation? We have installed over 160,000 ventless cooking applications worldwide. Visit www.turbochef.com/ventless for resources that can support your ventless installation and help you eliminate the need for wasteful hood systems.

Consumables and Accessories

TurboChef offers a variety of items that are necessary for the proper maintenance and operation of your oven, as well as products that help facilitate a specific or desired cook effect. Visit www.turbochef.com/consumables to order consumables and accessories.

TECHNOLOGY

RAPID COOK

TurboChef rapid cook ovens utilize top and/or bottom air impingement assisted by precise bursts of microwave to decrease cook times by more than 50% without compromising quality.

IMPINGEMENT

TurboChef impingement ovens utilize precisely controlled top and bottom air to increase heat transfer rates, resulting in cook times that are 40-50% faster. Optional integral catalytic converters allow for ventless operation.

MULTI-SHELF

Utilizing air convection and microwave assist, the TurboChef G5 can cook up to four times faster than conventional convection ovens and up to two times faster than a combi.

TURBOCHEF

SPECIALTY

TurboChef specialty ovens bring a combination of rapid cook, impingement, and convection technologies to all aspects of the kitchen.

The Panini produces perfect grill marks while cooking all the way through.

The Waterless Steamer excites the moisture already present in the food or dish for perfect steaming.

The Fire perfectly crisps and heats, providing hearth-baked pizza from a countertop design.

Söta (Model i1)

State of the art cooking.

- Serve warm, delicious food with minimal wait time
- Energy efficient – \$1.42/day to operate
- Small footprint – only 16 inches wide
- High-contrast, durable capacitive touch display†
- Manual mode for on-the-fly cooking†
- Customizable menu settings via USB, smart card, or manual entry††
- Up to 10 selectable languages†
- Includes tutorials for cleaning and usage†
- Allows use of metal pans
- Wi-Fi/cellular expandable for the connected kitchen†
- Capable of storing up to 256 unique recipe settings
- Exterior styling perfect for front of the house operations
- Operates without a ventilation hood (UL®-KNLZ certified*)

Söta (Model i1)

Söta (Model i1) with Touch Controls

1. Blower Motors
2. Top-Launched Microwave
3. Stirred Air Impingement (Top) and Microwave
4. Air Impingement (Bottom)
5. Catalytic Converter
6. Heater
7. Vent Catalyst

*Option available only on Söta with Touch Controls.
†USB optional on Söta without Touch Controls.
†† Visit www.turbochef.com/ventless for details and limitations.

"The Söta oven is a great way to present food to our customers in a timely manner and still have the quality that an oven provides. Our customers ask for their food items to be heated in the oven because it makes the food taste so great. It is easy to use and fits nicely on our counter space. The Söta is the perfect oven for the coffee shop setting."

i3

Versatility and throughput in less space.

- Consistent chef-quality results in a fraction of the time
- Large cavity size fits up to a half-size sheet pan – perfect for medium to large batch cooking
- Throughput equal to larger ovens without the space or energy cost requirements
- Allows use of metal pans
- Capable of storing up to 200 unique recipe settings
- High-contrast, durable capacitive touch display†
- Manual mode for on-the-fly cooking†
- Customizable menu settings via USB, smart card, or manual entry††
- Wi-Fi/cellular expandable for the connected kitchen†
- Up to 10 selectable languages†
- Includes tutorials for cleaning and usage†
- Stackable design (requires stacking cart, stand, and kit)
- Operates without a ventilation hood (UL®-KNLZ certified*)

Concessions

"The TurboChef i3 and i5 are the only ovens that would enable us to do all that we needed and offer a quality product. The main benefits are ease of use, cost, ventless operation, and the ability to cook our entire menu. The TurboChef ovens are a complete kitchen in a two square meter space, and have made the Gourmet Station concept possible."

Orlando Medeiros, Director of Food Service | Copenhagen

i5

Versatility and throughput delivered.

- Large cavity size fits up to a full-size hotel or gastronorm pan – perfect for large batch cooking
- Throughput equal to larger ovens without the space or energy cost requirements
- Allows use of metal pans
- Capable of storing up to 200 unique recipe settings
- High-contrast, durable capacitive touch display†

"The i5 oven is great for reducing cook times, particularly for well-done steaks. It is really good for producing 'en croûte' dishes, baked pasta, roast meats, pizzas, and baguettes. All the staff can use it, from juniors to our head chef, and they all get top quality food consistently. Suffice it to say we are delighted with every aspect of the oven."

Sue and Andrew Trevelyan, Owners | Halfway House Pub

Bullet

Revolutionary toasting and heating performance.

- Cooks delicious food faster than ever
- Throughput equal to larger ovens without the space or energy cost requirements

"A point of emphasis for Fuzion is to help create "green" restaurants that offer nutritious food at lower operating costs. This is accomplished by offering advanced cooking technologies that are easy to operate and environmentally safe, like the TurboChef HhB 2. The HhB 2 enables Fuzion to create a variety of healthy and flavorful recipes in just minutes, using a single platform with little training."

G5

Rapid cook on all five shelves.

- Superior quality and throughput
- Cooks up to four times faster than convection and up to two times faster than a combi
- Cook one to five trays of product at a time
- Simple and intuitive touch controls
- Smart cook compensation feature helps ensure consistent cook results
- Reversible fan controls
- Allows use of half-size sheet or half-size hotel pan up to two inches deep
- Patented convection and microwave technologies
- Stackable design (requires stacking kit)
- Smart menu capable of storing up to 3,888 unique recipe settings
- Manual mode for enhanced user control

1. Blower Motor
2. Removable Convection Baffle
3. Microwave
4. Inlet Air

MULTI-SHELF
FEATURES | SPECS | ENERGY USAGE

Waterless Steamer

Save over 150,000 gallons of water per year.

- Uses the natural water in food or dish to steam food internally without a water line, drain, or filtration system
- Marine-grade stainless construction
- No delimiting
- Cartridge style filter breaks down buildup
- Consistent chef-quality results, no matter who is doing the cooking
- Pre-programmed with steam settings
- Small footprint – only 16 inches wide
- Energy efficient – \$1.42/day to operate
- Customizable menu settings via USB, smart card, or manual entry
- Allows use of metal pans
- Capable of storing up to 256 unique recipe settings
- Operates without a ventilation hood (UL®-KNLZ certified*)

1. Blower Motors
2. Top-launched Microwave
3. Stirred Air Impingement (Top) and Microwave
4. Air Impingement (Bottom)
5. Catalytic Converter
6. Heater
7. Vent Catalyst

Hospitality

"The Panini oven has significantly decreased cook times while improving quality and our ability to serve customers. Previously, cook times were too long; usually 8-10 minutes. With the TurboChef Panini oven, sandwiches and quiches are cooked in less than a minute and a half. Now customers can sit down and enjoy their food and drink experience at the same time!"

Dan Molitor, General Manager | Sambalatte

TURBOCHEF

"We needed a multidimensional oven with a small footprint that could cook quickly and consistently. The TurboChef Fire has greatly helped to build our menu and the workflow is simple for employees. Fresh & Easy has gained new business and increased the basket size of customers who purchase menu items. With the TurboChef Fire, we can produce top of the line pizza in minutes, which means satisfied customers that shop more frequently."

Josh Zodka, Bakery Manager | Fresh & Easy

FIRE
FEATURES | SPECS

Patented Technology for Ventless Operation

TurboChef ventless ovens have internal systems for eliminating grease laden vapor prior to the grease escaping the oven; therefore, the ovens are certified as non-grease emitting appliances. When following our recommendations, TurboChef ovens can be installed without the aid of a Type I or Type II hood per International Mechanical Code (2006, 2009, and 2012), NFPA 96, NFPA 101 (Life Safety Code), EPA 202, and Underwriter's Laboratory (UL® KNLZ).

Certifications

Safety – cULus, TUV (CE)

Sanitation – NSF*, UL EPH*

Ventless – UL® KNLZ

How the Ovens are Tested

TurboChef ovens are evaluated according to UL®. The evaluation entails placing the test oven in an environmental chamber built to capture all emissions escaping during idle, cooking, and door-open conditions. During the eight-hour test period, a typical worst-case food item is cooked continually, and 100% of condensable and non-condensable emissions from the product are collected and analyzed according to the EPA 202 Test Method. At the conclusion of the test, the total concentration of particulate matter (emissions) must be less than 5.0 mg/m³ for the oven to be certified for ventless operation. Cooking devices that measure above the 5.0 mg/m³ threshold are considered to produce grease and must be installed under Type I ventilation, according to International Mechanical Code.

TurboChef ovens are well below the 5.0 mg/m³ threshold as shown adjacent.

Menu Requirements

TurboChef ovens have been approved by Underwriter's Laboratory for ventless operation (UL® KNLZ listing) for all food items except for foods classified as "fatty raw proteins." Such foods include bone-in, skin-on chicken, raw hamburger meat, raw bacon, raw sausage, steaks, etc.

The TurboChef certification includes precooked food items such as pizza toppings, sandwich meats, frozen appetizers, and cheeses. Additionally, raw, lean meats such as boneless, skinless chicken breasts and fish fall within the certification.

Submittal Recommendations*

- Determine which agency requires notification, i.e., health, building, or both.
- Submit the appropriate package for your oven type. Submittal packages can be located at www.turbochef.com/ventless.
- Include the following items:
 - HVAC analysis demonstrating adequate cooling exists to offset the oven's load.
 - Your menu, as ventless operation is not supported when cooking fatty raw proteins.

If you are unsure of your food type, require further assistance, or your request is rejected by local authorities and/or jurisdictions, email us at ventless.help@turbochef.com.

*NSF certification applies to the Tornado, C3, and H20 2 ovens only. UL EPH certification applies to all ovens except the C3. Ultimate ventless allowance is dependent upon AHU approval, as some jurisdictions may not recognize the UL® certification or application.

† The H2C 2630, H2C 3020, and H2C 3618 ovens may require installation of additional fire suppression equipment at the discretion of local authorities or jurisdictions.

TurboChef Connected Kitchen

Find out what your oven can tell you about your business! With the TurboChef Connected Kitchen, you can update your oven settings, gather data, and much more by simply logging in to our portal via computer, tablet, or smart phone. Available on the new Söta, i3, i5, Bullet, and Panini ovens with Touch Controls, the TurboChef connected ovens capture real-time event logging for up-to-the-minute point of sale data.

Benefits

- Set schedules to remotely update oven cook settings
- Real-time event logging provides up-to-the-minute point of sale data
- Export and analyze oven performance data, including which products were cooked and when
- Set up oven communities to organize your ovens geographically, by application, or however you want
- Set schedules to remotely update oven firmware when TurboChef adds features or improves functionality
- Real-time fault alerts improve service diagnostics
- Data encrypted, securely stored, and protected on the Digi Cloud: security policy based on 175 controls outlined in CSA, ISO27002, NERC CIP, PCI, and HIPAA standards, enforced with active monitoring tools, and verified with policy compliance audits
- Cost of service and data storage included with oven for the first year, with option to continue service beyond

Connectivity Options*

All TurboChef ovens with Touch Controls are Wi-Fi, cellular, or LAN expandable for the connected kitchen. Different connectivity options are available to suit your needs.

* Connectivity option must be specified when ordering oven. Additional fees apply for Wi-Fi and cellular devices and services.

Menu Management Made Simple

Online Cookbook

To start building your own menu, visit cookbook.turbochef.com and view thousands of palate-pleasing recipes. The online cookbook provides comprehensive information on preparing a variety of food products, as well as simple, optimized settings you can use to program any TurboChef oven.

ChefComm Pro: Menu Builder

ChefComm Pro empowers you to easily create, update, and distribute menu settings from your PC. ChefComm Pro is available in both full-edit and limited (no edit) versions to help ensure your menu settings will not be altered.

- Simple interface for menu building on your PC instead of in front of an oven
- Allows the convenience of emailing menu settings
- Stores menu settings to smart cards and USB devices
